October 14, 2009

Good Afternoon,

The Great Lakes Stewardship Initiative (GLSI), in partnership with Muskegon Conservation District (MCD) and the MAISD Regional Mathematics and Science Center, invites you to participate in an Environmental Education Expo. The purpose of the Expo is to connect local environmental organizations with teachers who would like to implement environmental education and projects that will have a positive lasting impact on local natural resources.

Students are a large citizen base of our communities and it is imperative that local environmental organizations collaborate to share resources to empower them to make a difference in our communities.

We are asking all local environmental organizations to participate by creating a display or poster and sending a representative to the event to inform teachers of;

1. The mission of your organization and how you meet that mission
2. How student groups could assist you in meeting your goals
3. Materials or services that your organization can provide for environmental learning experiences
4. Specific project ideas for teachers and students that will lead to sustainable communities

The Expo is being held on Dec. 2nd from 4:00 – 6:00 pm at the Grand Valley State University's Michigan Alternative and Renewable Energies Center (MAREC), 200 Veridian Dr., in downtown Muskegon.

The MCD, MAISD Regional Mathematics and Science Center, and GLSI will partner to promote this event to K-12 teachers from Oceana, Muskegon, Newaygo, and Northern Ottawa counties. We look forward to your participation in this event to strengthen environmental education in West Michigan.

Please fill out the attached form and return it to me to register your organization for this event.

Thank you,

Alyssa Merten
Muskegon Conservation District
